

EVERYDAY WITH ORELLO

Cleaning and maintaining your ORELLO Solid Surface Sink is simple and easy to do as part of your usual household cleaning routine.

Recommended products for caring for your ORELLO Solid Surface Sink are available online at www.karoniastore.com.

GENERAL CLEANING

Day to day grease and grime is easily removed with Karonia Solid Surface Cleaner. Rinse the sink with warm water to remove any loose food debris, spray the Karonia Solid Surface Cleaner directly onto the sink surface and wipe clean using a damp cloth.

Stubborn surface marks can be removed using a Magic Eraser Sponge and the Karonia Solid Surface Cleaner. Spray the cleaner directly onto the

affected area, leave for 30 seconds and rub over the area using a Magic Eraser Sponge.

MAINTENANCE *(Monthly)*

To maintain your sinks bright white appearance, we recommend that you fill the sink with diluted bleach and leave overnight. Wearing protective gloves, drain the sink and rinse thoroughly with clean water.

RECOMMENDATIONS OF USE

STAINS

- We recommend running water into the sink when pouring dark/strong liquids such as coffee, tea, curry and sauces.
- Any of these liquids or items, such as tea bags that may leave surface stains, should be removed and cleaned immediately.
- In any case, the non-porous surface will not permanently stain. Tougher dried on surface stains may require the above cleaning processes to be repeated in order to remove them.

HEAT

- Never place any hot objects (e.g. pans and baking trays) directly from a heat source into the sink; always allow items to cool first.
- Always run cold water when pouring hot/boiling liquids into the sink.
- Never run boiling water taps directly into the sink.

CHEMICALS

- Avoid exposing the sink to any strong chemicals such as acids, oven cleaners, paint removers etc.
